

## Trees of Birchfield Gardens

These are the main trees and their locations in Birchfield Gardens near to my house. Some of these trees are native to the United Kingdom. They are Beech, Silver Birch, Holly, Lime, English Oak, Scots Pine and Willow. Some of the trees come from other countries but have made their home here. They are known as non-native. These trees are Red Oak, Turkey Oak, Sweet Chestnut, Horse Chestnut and Sycamore. Even though these are non-native trees lots of our wildlife depends on them and they are an important part of our landscape.

### Identification
